IDEA Diagnostic Form Report

To learn more, see the Interpretive Guide: www.theideacenter.org/diagnosticquide.pdf

There were <u>23</u> students enrolled in the course and <u>19</u> students responded. Your results are considered <u>fairly reliable</u>. The <u>83</u>% response rate indicates that results are <u>representative</u> of the class as a whole.

Summary Evaluation of Teaching Effectiveness

Teaching effectiveness is assessed in two ways: **A. Progress on Relevant Objectives**, a weighted average of student ratings of the progress they reported on objectives selected as "Important" or "Essential" (double weighted) and **B. Overall Ratings**, the average student agreement with statements that the teacher and the course were excellent. The **SUMMARY EVALUATION** is the average of these two measures. Individual institutions may prefer to combine these measures in some other manner to arrive at a summary judgment.

<u>Converted Averages</u> are standardized scores that take into account the fact that the average ratings for items on the IDEA form are not equal; students report more progress on some objectives than on others. Converted scores all have the same average (50) and the same variability (a standard deviation of 10); about 40% of them will be between 45 and 55. Because measures are not perfectly reliable, it is best to regard the "true score" as lying within plus or minus 3 of the reported score.

For comparative purposes, use converted averages. Your converted averages are compared with those from all classes in the IDEA database. If enough classes are available, comparisons are also made with classes in the same broad discipline as this class and/or with all classes that used IDEA at your institution. The Interpretive Guide offers some suggestions for using comparative results; some institutions may prefer to establish their own "standards" based on raw or adjusted scores rather than on comparative standing.

Both <u>unadjusted</u> (raw) and <u>adjusted</u> averages are reported. The latter makes classes more comparable by considering factors that influence student ratings, yet are beyond the instructor's control. Scores are adjusted to take into account student desire to take the course regardless of who taught it (item 39), student work habits (item 43), instructor reported class size, and two multiple item measures (student effort not attributable to the instructor and course difficulty not attributable to the instructor).

Student Ratings of Learning on Relevant (Important and Essential) Objectives

Average unadjusted (raw) and adjusted progress ratings are shown below for those objectives you identified as "Important" or "Essential." Progress on Relevant Objectives (also shown on page 1) is a weighted average of student ratings of the progress they reported on objectives selected as "Important" or "Essential" (double weighted). The percent of students rating each as "1" or "2" (either "no" or "slight" progress) and as "4" or "5" ("substantial" or "exceptional" progress) is also reported. These results should help you identify objectives where improvement efforts might best be focused. Page 3 contains suggestions about the types of changes you might consider to obtain more satisfactory results. Also, refer to the POD-IDEA Center Learning Notes (www.theideacenter.org/podidea/PODNotesLearning.html).

	Importance Rating		verage at scale)		ent of s Rating
	,	Raw	Adj.	1 or 2	4 or 5

Description of Course and Students

Students described the course by rating three items related to "level of academic challenge." Results cannot be interpreted as "good" or "bad"; in general, these ratings have a slight positive relationship with measures of academic achievement. The three items describing your students relate to their academic motivation and work habits and are key factors in developing adjusted ratings.

Course Description	Your Average (5-point scale)
33. Amount of reading	3.5
34. Amount of work in other (non-reading) assignments	3.5
35. Difficulty of subject matter	3.8

Student Description

37. I worked harder on this course than on most courses I have taken.	3.3
39. I really wanted to take this course regardless of who taught it.	2.8
43. As a rule, I put forth more effort than other students on academic work.	4.1

Improving Teaching Effectiveness

One way to improve teaching effectiveness is to make more use of the teaching methods closely related to learning on specific objectives.

- Peview page 2 to identify the objective(s) where improvements are most desirable.
- > Use the first column to answer the question, "Which of the 20 teaching methods are most related to learning on these objective(s)?"
- > Review the next two columns to answer the question, "How did students rate my use of these important methods?"
- > Read the last column to answer the question, "What changes should I consider in my teaching methods?"
- > Beyond specific methods, do the results suggest a general area (e.g., Stimulating Student Interest) where improvement efforts should be focused?

Suggested Actions are based on comparisons with ratings for classes of similar size and level of student motivation. Consider increasing use means you employed the method less frequently than those teaching similar classes. Retain current use or consider increasing means you employed the method with typical frequency. Strength to retain means you employed the method more frequently than those teaching similar classes. More detailed suggestions are in the Interpretive Guide (www.theideacenter.org/diagnosticguide.pdf), POD-IDEA Center Notes (www.theideacenter.org/podidea), and POD-IDEA Center Learning Notes (www.theideacenter.org/podidea/PODNotesLearning.html).

The details on this page are of interest primarily to those who want to confirm scores reported on pages 1–3 or who want to determine if responses to some items were distributed in an unusual manner.

Converted Averages are reported only for relevant learning objectives (Important or Essential –see page 2) and other items for which comparisons were provided.

Notes:

Consider selecting fewer objectives as "Important or "Essential."

IDEA Diagnostic Form Report

To learn more, see the Interpretive Guide: www.theideacenter.org/diagnosticguide.pdf

There were <u>24</u> students enrolled in the course and <u>18</u> students responded. Your results are considered <u>fairly reliable</u>. The <u>75</u>% response rate indicates that results are <u>representative</u> of the class as a whole.

Summary Evaluation of Teaching Effectiveness

Teaching effectiveness is assessed in two ways: A. Progress on Relevant Objectives, a weighted average of student ratings of the progress they reported on objectives selected as "Important" or "Essential" (double weighted) and B. Overall Ratings, the average student agreement with statements that the teacher and the course were excellent. The SUMMARY EVALUATION is the average of these two measures. Individual institutions may prefer to combine these measures in some other manner to arrive at a summary judgment.

Converted Averages are standardized scores that take into account the fact that the average ratings for items on the IDEA form are not equal; students report more progress on some objectives than on others. Converted scores all have the same average (50) and the same variability (a standard deviation of 10); about 40% of them will be between 45 and 55. Because measures are not perfectly reliable, it is best to regard the "true score" as lying within plus or minus 3 of the reported score.

For comparative purposes, use converted averages. Your converted averages are compared with those from all classes in the IDEA database. If enough classes are available, comparisons are also made with classes in the same broad *discipline* as this class and/or with all classes that used IDEA at your *institution*. The *Interpretive Guide* offers some suggestions for using comparative results; some institutions may prefer to establish their own "standards" based on raw or adjusted scores rather than on comparative standing.

Both <u>unadjusted</u> (raw) and <u>adjusted</u> averages are reported. The latter makes classes more comparable by considering factors that influence student ratings, yet are beyond the instructor's control. Scores are adjusted to take into account student desire to take the course regardless of who taught it (item 39), student work habits (item 43), instructor reported class size, and two multiple item measures (student effort not attributable to the instructor and course difficulty not attributable to the instructor).

Student Ratings of Learning on Relevant (Important and Essential) Objectives

Average unadjusted (raw) and adjusted progress ratings are shown below for those objectives you identified as "Important" or "Essential." Progress on Relevant Objectives (also shown on page 1) is a weighted average of student ratings of the progress they reported on objectives selected as "Important" or "Essential" (double weighted). The percent of students rating each as "1" or "2" (either "no" or "slight" progress) and as "4" or "5" ("substantial" or "exceptional" progress) is also reported. These results should help you identify objectives where improvement efforts might best be focused. Page 3 contains suggestions about the types of changes you might consider to obtain more satisfactory results. Also, refer to the POD-IDEA Center Learning Notes (www.theideacenter.org/podidea/PODNotesLearning.html).

Description of Course and Students

Students described the course by rating three items related to "level of academic challenge." Results cannot be interpreted as "good" or "bad"; in general, these ratings have a slight positive relationship with measures of academic achievement. The three items describing your students relate to their academic motivation and work habits and are key factors in developing adjusted ratings.

Course Description	Your Average (5-point scale)
33. Amount of reading	3.2
34. Amount of work in other (non-reading) assignments	3.3
35. Difficulty of subject matter	3.7

Student Description

37. I worked harder on this course than on most courses I have taken.	3.3
39. I really wanted to take this course regardless of who taught it.	3.5
43. As a rule, I put forth more effort than other students on academic work.	3.9

Your Converted Average When Compared to Group Averages										
IDE	r Institution									
50	Similar	45	45 Similar		Similar					
48	Similar	48	Similar	46	Similar					
55	Similar	59	Higher	54	Similar					

46	Similar	50	Similar	45	Similar
53	Similar	59	Higher	52	Similar
60	Higher	58	Higher	53	Similar

Much Higher = Highest 10% of classes (63 or higher)

Higher = Next 20% (56-62) Similar = Middle 40% (45-55) = Next 20% (38-44) Lower Much Lower = Lowest 10% (37 or lower)

Improving Teaching Effectiveness

One way to improve teaching effectiveness is to make more use of the teaching methods closely related to learning on specific objectives.

- > Review page 2 to identify the objective(s) where improvements are most desirable.
- > Use the first column to answer the question, "Which of the 20 teaching methods are most related to learning on these objective(s)?"
- > Review the next two columns to answer the question, "How did students rate my use of these important methods?"
- > Read the last column to answer the question, "What changes should I consider in my teaching methods?"
- > Beyond specific methods, do the results suggest a general area (e.g., Stimulating Student Interest) where improvement efforts should be focused?

Suggested Actions are based on comparisons with ratings for classes of similar size and level of student motivation. Consider increasing use means you employed the method less frequently than those teaching similar classes. Retain current use or consider increasing means you employed the method with typical frequency. Strength to retain means you employed the method more frequently than those teaching similar classes. More detailed suggestions are in the Interpretive Guide (www.theideacenter.org/diagnosticguide.pdf), POD-IDEA Center Notes (www.theideacenter.org/podidea), and POD-IDEA Center Learning Notes (www.theideacenter.org/podidea/PODNotesLearning.html).

Feaching Methods and Styles				
	Relevant to Objectives: (see page 2)	Your Average (5-point scale)	Percent of Students Rating 4 or 5	Suggested Action
Stimulating Student Interest				
15. Inspired students to set and achieve goals which really challenged them	All selected objectives	4.0	67%	Retain current use of consider increasing
8. Stimulated students to intellectual effort beyond that required by most courses	All selected objectives	4.2	78%	Strength to retai
13. Introduced stimulating ideas about the subject	All selected objectives	4.4	78%	Strength to retain
4. Demonstrated the importance and significance of the subject matter	22, 23, 30	4.5	89%	Strength to retai
Fostering Student Collaboration				
18. Asked students to help each other understand ideas or concepts	28, 30, 31	4.1	72%	Retain current use of consider increasing
16. Asked students to share ideas and experiences with others whose backgrounds and viewpoints differ from their own	28, 30, 31	4.6	89%	Strength to retai
5. Formed "teams" or "discussion groups" to facilitate learning	Not relevant to objectives selected	3.8	61%	
Establishing Rapport				
2. Found ways to help students answer their own questions	All selected objectives	4.5	83%	Strength to reta
7. Explained the reasons for criticisms of students' academic performance	23, 28, 31	4.2	72%	Strength to retain
Displayed a personal interest in students and their learning	23, 28	4.6	89%	Strength to reta
 Encouraged student-faculty interaction outside of class (office visits, phone calls, e-mails, etc.) 	Not relevant to objectives selected	4.3	83%	
Encouraging Student Involvement				
19. Gave projects, tests, or assignments that required original or creative thinking	28, 31	4.3	83%	Retain current use consider increasing
11. Related course material to real life situations	23, 30	4.5	94%	Strength to reta
Encouraged students to use multiple resources (e.g. data banks, library holdings, outside experts) to improve understanding	Not relevant to objectives selected	4.0	78%	
 Involved students in "hands on" projects such as research, case studies, or "real life" activities 	Not relevant to objectives selected	4.1	72%	
Structuring Classroom Experiences				
6. Made it clear how each topic fit into the course	22, 23, 30	4.4	83%	Retain current use consider increasing
10. Explained course material clearly and concisely	22, 23	4.2	72%	Retain current use of consider increasing
12. Gave tests, projects, etc. that covered the most important points of the course	22	4.3	83%	Retain current use consider increasing
Scheduled course work (class activities, tests, projects) in ways which encouraged students to stay up-to-date in their work	Not relevant to objectives selected	4.7	94%	Sorioladi moredali
17. Provided timely and frequent feedback on tests, reports, projects, etc. to help	Not relevant to objectives	4.6	89%

The details on this page are of interest primarily to those who want to confirm scores reported on pages 1–3 or who want to determine if responses to some items were distributed in an unusual manner.

Converted Averages are reported only for relevar learning objectives (Important or Essential –see page 2) and other items for which comparisons were provided.

Notes:
